Effective communication · Teamwork · Problem solving · Adaptability · Time management

WORK EXPERIENCE

Software Developer
Berhlan de Colombia S.A.S.
April – Present

- Full-stack development of corporate web platforms with Laravel and PHP.
- Implementation of real-time communication features using WebSockets.
- Design of management modules with reporting and automated data exports.

Mentor
Sofka Technologies
2025 – Present

- Mentor in a 21-week software development training program.
- Curriculum design covering Git, HTML, CSS and JavaScript.
- Led the project-based track for building full-stack applications.

TECHNICAL SKILLS

PHP · Laravel · Node.js · Express · TypeScript · JavaScript · React · Python · MySQL · PostgreSQL · HTML · CSS · Git · AWS (EC2, S3, Lambda) · WebSockets

Personal Projects

AI-Powered Interactive Journal

- Integrated artificial intelligence for emotional well-being using OpenAI, Google AI and Microsoft Azure AI APIs.
- Applied natural language processing (NLP) in a conversational context.

Portfolios and Blogs with React

- Built custom blogs and web portfolios with React, JavaScript, HTML and CSS.
- Implemented responsive design with Bootstrap.

Serverless Architectures on AWS

- Explored AWS CloudFormation to manage infrastructure as code.
- Configured EC2 instances, IAM roles and Security Groups.

Online Store with WordPress and WooCommerce

- Set up products, payments and shipping for an e-commerce store.
- Implemented SEO strategies for organic search ranking.

Jóvenes creaTIvos Curriculum (Sofka Technologies)

- Designed and managed the training program's curriculum in Notion, with separate instructor and student views.
- Led the "Mi emprendimiento digital" project, where students integrate an AI feature into a real full-stack application.

Generative AI Tools

- Use of Claude Code for AI-assisted development of personal projects, from planning to implementation.
- Guided students in integrating AI features into web applications.
